

### Goal 3: Ensure The University Remains National Leader in Sustainability

- Participated in the Conestoga River clean up.
- Brought in industrial tub grinder to create our own mulch from storm debris and regular clippings/leaf clean up.
- Planted an orchard at the water tower (NW section of campus).
- Replanted the science pond riparian buffer in partnership with the Alliance for the Chesapeake Bay.
- Dredged both the main campus and science ponds on campus which supports stormwater management.
- Reinstated a Sustainability Manager position.
- Hosted the Eurofins Sustainability Department (very active in vehicle charging program) for a brief tour of Lombardo Welcome Center.
- Attended the White House Forum on Campus and Community-Scale Climate Change Solutions in March 2023. Millersville University was the only PASSHE university to attend this prestigious event.
