Master of Education degree programs are designed to enable the student to become highly skilled as a professional practitioner in education. Each M.Ed. curriculum includes a component in the respective subject matter (e.g., art, elementary education, English, etc.) and a common set of courses in the philosophical, psychological and sociological principles involved in teaching and learning.

The Profession Core is intended to develop skills and tools for making education decisions. Thus, core courses should be scheduled early in a student's program.
