The EHS office's main job is to ensure the health and safety of all employees on campus. They provide training and guidance on various topics, including laboratory safety, workplace safety, and hazardous waste management. They also investigate accidents and provide support to departments affected by workplace accidents.
Environmental Compliance

Workers Compensation

Fire Safety

Health & Safety

Environmental Health & Safety

Emergency Preparedness

Radiation Safety

Chemical Safety/Toxic

Hazardous Waste

The EHS Office is responsible for the administration of the Workers Compensation System. Any worker injured on the job must report the injury through their department or through the Office of the VP of Administration. The EHS Office works with the Personnel Office to process injuries and with the Workers Compensation carrier to handle claims. The EHS Office also works with the Department of Human Resources to ensure that all workers are properly insured under the Department of Labor guidelines.

In the event of a radiation exposure, the EHS Office must be notified immediately. All exposures must be reported to the Radiation Safety Officer. The Radiation Safety Officer will coordinate the response with the appropriate authorities.

The EHS Office is responsible for the disposal and management of all hazardous waste generated on campus. All hazardous waste must be properly disposed of by licensed waste haulers. The EHS Office works with the Environmental Health & Safety Office to ensure that all waste is properly disposed of.

The EHS Office is responsible for the training and supervision of all employees in their role. This includes providing regular safety training and conducting regular safety inspections. The EHS Office also works with the Fire Department to ensure that all safety regulations are followed.

The EHS Office is responsible for the maintenance of all safety equipment on campus. This includes ensuring that all equipment is properly maintained and that all employees are properly trained in its use.

The EHS Office is responsible for the implementation and enforcement of all environmental health & safety regulations.

The EHS Office is responsible for the coordination of all environmental health & safety incidents on campus.

The EHS Office is responsible for the coordination of all emergency preparedness plans on campus.
