

Blackboard 6: Adding Matching Questions

9 Steps

This Step-by-Step explains the procedures for adding a matching question in Blackboard 6.

This Step-by-Step assumes that the quiz has already been added and accessed.

1.) Select "Matching" from the drop-down menu and click "Go"

Add

Matching Question

* Question Text

Smart Text
 Plain Text
 HTML

* Point Value

2.) Type in the desired question in the text field labeled, "Question Text".
 - You will also need to enter a point value in the text field labeled, "Point Value"

3.) You will then need to type the question that you want to be matched with an answer. This information will be typed into the text field labeled "Question 1"
 Note: this will be repeated for up to 20 questions.

4.) You will then need to type the answer to the question into the text field labeled, "Answer 1".
 Note: this will be repeated for up to 20 answers.

Answer 1:

Smart Text
 Plain Text
 HTML

Question 1:

Smart Text
 Plain Text
 HTML

5.) Click "Next"

6.) You will now assign each question its letter value. Click the drop-down menu alongside of each question and choose this correct letter.

Assign

Match each question item to the correct answer item using the drop-down list.

Match	Question Items	Answer Items
<input type="button" value="A"/>	1. Macintosh Computer (dual monitor) Administrator	A. 1stamac
<input type="button" value="A"/>	2. idteam	B. idt2004a
<input type="button" value="A"/>	3. BlackBoard 5.5 superdesigner	C. idteam2004
<input type="button" value="A"/>	4. BlackBoard 6.1 sidbbadmin	D. idt2004

7.) You may now enter a correct answer and incorrect answer response feedback.

Feedback

Enter feedback that will display in response to a correct answer and an incorrect answer.

Correct Response Feedback

Smart Text
 Plain Text
 HTML

Incorrect Response Feedback

8.) Click "Submit"

9.) A receipt will appear showing what you just created, click "OK" and you are done.
