

Adding Titles to iMovie in 3 Steps

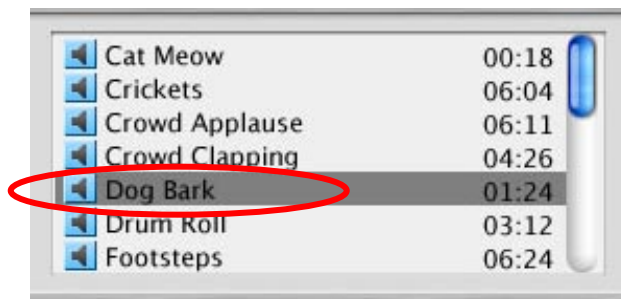

Prerequisite Knowledge: This document assumes an iMovie file has already been created and is open on the desktop.

This Step-by-step explains the procedures for adding titles to an iMovie file.

- 1) Click on the **Title** tab located in the **Design Panel** on the right hand side of the screen.

- 2) Select the audio clip to be inserted into the movie from the **Sound Effects Window**.

- 3) Click on the audio clip and drag it into the **Playhead** in the Timeline where the sound is going to occur. The sound clip can be adjusted by sliding it back and forth until its desired area.
