

Creating Forms Using Macromedia Dreamweaver MX 2004 4 Steps

This Step-by-Step explains the procedures for creating a form inside Macromedia Dreamweaver MX 2004 to be published on a faculty member's website.

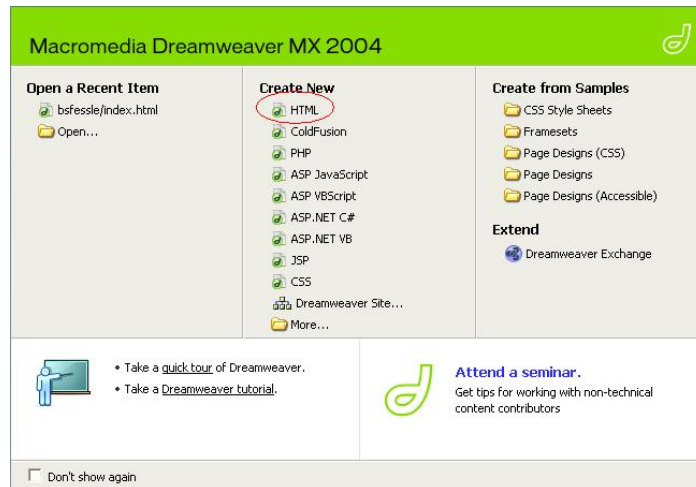

This Step-by-Step assumes that the user has already created a website using Macromedia Dreamweaver MX 2004.

1.) Start Dreamweaver MX 2004 and choose "HTML" under the "Create New" heading.

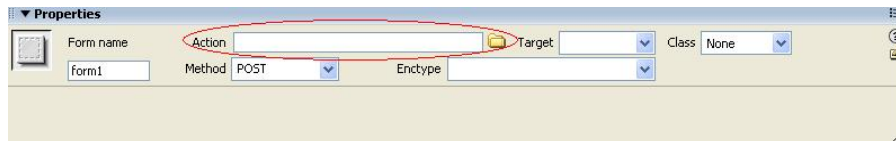

2.) From the drop down menus at the top of the screen choose Insert > Form > Form.

- A red dashed box will appear on the screen.

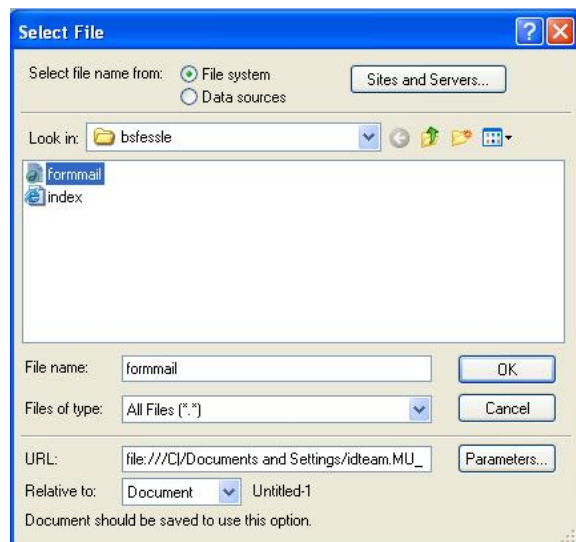

- All Text Fields, Hidden Fields, Radio Buttons, Check Boxes and Menus **MUST** be inside this dashed box.

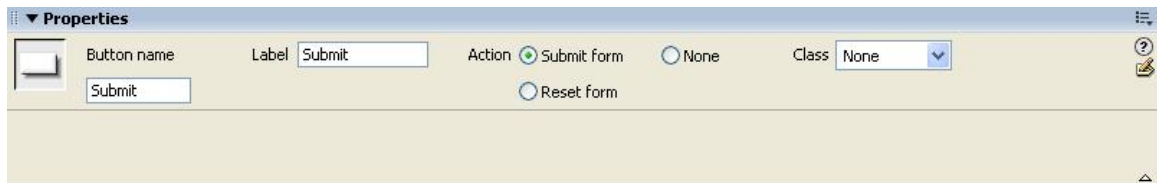

3.) In the Properties window click the folder icon next to "Action"

In the new window navigate to your website's root folder and choose "formmail.php" and click "OK"

4.) You will now need to create a submit button. Click Insert > Form > Button. You may then edit what your button will say on it by entering the desired text into the “Label” category in the Properties window. The action should be set to Submit.

5.) Save your document.

You have now created your form.

Please refer to the documentation under the Dreaweaver MX 2004 on how to add fields inside your form.
