

'VILLE UNPLUGGED

ENERGY DECISION MAKER PLEDGE

As the lead author of my own decision-making, I choose to make energy-conscious decisions to help Millersville University save energy and reduce greenhouse gas emissions.

I PLEDGE TO:

- Turn off my computer when not in use.
- Activate sleep mode on my computer and devices.
- Turn off the lights when leaving the room.
- Use the stairs instead of the elevator where appropriate.
- Wash clothes in cold water instead of hot when possible.
- Use cold water to brush my teeth.
- Eliminate vampire load, by unplugging chargers, appliances and devices when not in use.
- Choose natural light over the light switch where appropriate.
- Run the dishwasher, washer and dryer only when full.
- Wear seasonally-appropriate clothes before adjusting the thermostat.
