If you have an inquisitive mind and enjoy subjects such as mathematics, biology, chemistry and physics, you probably would find a career in safety interesting. Another important indicator is an interest in helping people. This is a primary reason that drives many of the activities of safety professionals. (Source: The American Society of Safety Engineers)

DEGREE

BACHELOR OF SCIENCE (B.S.)
OCCUPATIONAL SAFETY & ENVIRONMENTAL HEALTH

Applied Engineering and Technology Management (AETM) The Occupational Safety and Environmental Health (OSEH) program strives to develop well-rounded professionals uniquely capable of protecting employees and the general public from work-related injuries and illnesses, while also protecting company assets and interests. To achieve this goal, the OSEH program has established a Bachelor of Science curriculum that prepares students for responsibilities that can include injury & illness prevention, environmental protection, ergonomics, fire protection, industrial hygiene, safety engineering, system safety and safety management.

OSEH students can minor in any of the concentrations offered in the Applied Engineering, Safety & Technology (AEST) department.

PROGRAM LEARNING OBJECTIVES

The OSEH program is designed for people interested in professions in the occupational safety and environmental health fields. Objectives of the program include:

• Prepare students to enter the occupational safety and environmental health profession as a generalist with the skills necessary to begin a successful career.

• Encourage interest in continued professional development and lifelong learning through formal graduate study and other professional development courses, programs and opportunities.

• Foster the ability to apply knowledge of math, science and applied science principles to resolve safety and environmental health related issues.

• Provide the fundamental education necessary to justify the receipt of the Graduate Safety Practitioner designation provided by the Board of Certified Safety Professionals.

• Provide a solid educational foundation on which the graduate can build a career in an OSEH area, as well as pursue a multitude of scientific, social and culturally-based opportunities.

• Prepare students to function within multidisciplinary teams.

3 Reasons to become an OSEH Professional

B. S. OCCUPATIONAL SAFETY & ENVIRONMENTAL HEALTH

1. An opportunity to protect people and the environment

2. High job satisfaction

3. Excellent employment opportunities & starting salaries
INTERNET OPPORTUNITIES

The internship requirement in the Occupational Safety & Environmental Health (OSEH) program at Millersville University has always been considered the most valuable component of our students’ academic experience. The typical OSEH Intern has completed four years of undergraduate studies, with a balance of courses in safety, environmental health and the sciences. Through the internship, students make a very important transition from college study about a profession to actual experience within that profession. Interns are expected to work a regular shift of approximately 40 hours per week for a full semester.

ABOUT OUR GRADUATES

Approximately 88 percent of our graduates have found employment in the Environmental Health and Safety profession. The largest employers of Safety Professionals are manufacturing, service industries, construction, insurance, consulting firms and the government. A sampling of job titles held by OSEH graduates include the following:

- Health & Safety Specialist
- Risk Manager
- Safety Representative
- Safety Manager
- Safety Engineer
- Industrial Hygienist
- Safety & Health Consultant
- Ergonomist

CLUBS & ACTIVITIES

American Society of Safety Engineers (ASSE) – Millersville University – ASSE is the world’s oldest and largest professional safety organization. Our students are consistently awarded scholarships from ASSE and a few private foundations. They also attend numerous local and national conferences that bring them in touch with national experts.

FACILITIES

There are four separate laboratory facilities dedicated to the OSEH program.

- Safety Engineering
- Fire Prevention & Control
- Industrial Hygiene
- Ergonomics

ACCREDITATION

The OSEH program is one of only three schools in the nation that offers a degree that is accredited by the Accreditation Board for Engineering and Technology (ABET) under the Environmental, Health and Safety Criteria. Graduates of the program are eligible for the Graduate Safety Practitioner (GSP) designation from the Board of Certified Safety Professionals (BCSP).
