SEPTEMBER 1, 2020

Dear Campus Community,

As I mentioned in last Friday's weekly update, the Fall 2020 COVID-19 Incident Management Team (IMT) at Millersville University is now up and running. The IMT will meet twice a week to refine and execute the Fall Reopening Implementation Team's report. The IMT will also serve as the coordinating body for response activities across the University.

The IMT members are:

- Diane Copenhaver
- Dr. James Delle
- Dr. Victor DeSantis, co-chair
- Dr. Duane Hagelgans, co-chair
- Josh Hartranft
- Janet Kacskos
- Joanne Ocasio
- Tom Richardson
- Eric Sheppard
- Dr. Timothy Weaver
- Patrick Weidinger
- Dr. Sepi Yalda

Currently the team is working on two important matters. The first is developing a process for how to report on positive or suspected cases. The second is a process for making sure the appropriate people on campus are aware of positive COVID tests and deploying services where needed.

A dashboard is being developed for the [Fall 2020](#) webpage that will list the number of positive cases, both active and cumulative, among students and faculty and staff. The dashboard will only indicate students who either live on campus or have been on campus, and faculty/staff who have been on campus. The dashboard will be operational by the end of the week.

In the meantime, I want to share that there are three active positive cases and two positive cases that are non-active. The three active cases are students who live off-campus and are self-isolating. The Pennsylvania Department of Health has been notified.

All future updates on COVID cases will be sent by the IMT co-chairs. If you have any COVID-19 specific questions please fill out the [contact form](#) on the Fall 2020 webpage.

Be kind, be safe and stay healthy.

With warm regards,

Daniel A. Wubah
University President

Millersville University
