

Microworld@Home: Millersville

A LIVE-STREAM EVENT ON ZOOM AND YOUTUBE

SAVE THE DATE: OCTOBER 26, 2020 FROM 4 – 5:30 P.M.

Microworld@HOME is an experimental digital art space. Since March, we've been working with others to create an exciting and responsive online experience broadcast from a 4x4 metre room in our apartment.

And now, we'd like to collaborate with you to create a transatlantic Microworld. Everyone involved can watch the stream on YouTube or join the broadcast on Zoom.

4 ways to join in

1. Send us your Video or Audio clips

- Short clips (up to 1 minute long). We'll feed them into our generative programs where they will be mashed up and projected or played into the space
- Short films up to 5 mins
- Music / Sonic Art - composed pieces up to 5 min

Media files can be any format - preferably mp3 / mp4 / waves / movs / H.264 (any Qs check with us)

2. Send us your Computer program

Generative programs written in Processing (free to download and use). We will run your program as part of the show.

3. Live performance

Use zoom or other streaming service and we'll feed it into the Microworld. Let us know what you'd like to do and we'll schedule it into the event.

4. Live interaction via our sprite app

Simply use our online app to send sprites into the Microworld in real time.

Expect visual mashups, audio jams and zoom interaction

Looking forward to meeting you

Nicola and Tim
