Millersville University Internship Showcase Spring 2017, 2018

- *Millersville University Internship Showcase* provided interns with the opportunity to share their meaningful experiences, detailing projects and skills learned at the internship as well as offering insights into the experiences of the organizational culture of the business and how that may inform their future career decisions.
- The Millersville community - students, faculty, staff and invited employers – were afforded the opportunity to become more familiar with the range of internships MU students engaged in with employers and non-profit organizations.
- Experiential Learning and Career Management's two objectives for participating in Made in Millersville included: 1) Assisting students with reflecting on and articulating what they learned about their future career and themselves through these experiences, and 2) encouraging other students to begin planning on securing an internship for academic credits.
