Professional Development School
2023 (Spring to Fall)
Information Session
Millersville University
September 20, 2022
Update from Field Office

Becky Jachimowicz
Department of Field Services – Field Placements

✘ Clearances
✘ Student Teacher Sign-up (formerly “Yellow Card”)
✘ Student Teaching Application (PDS modified version formerly “Intent to Student Teach Packet”)

2
Today’s PDS Information

1) Provide you with an orientation to MU’s Program
2) Allow you to learn from PDS students
3) Share an overview of our district partners
4) Tell you about the interview & orientation process
5) Review process for selecting your top three districts
Schedule for PDS Interns

Spring 2023:

✘ Mondays & Tuesdays: Classes on Campus (strategies learned)
✘ Wednesday, Thursday, Friday: Full School Days (strategies implemented)

Fall 2023:

✘ Full-time Student Teaching
The Process

1. Select your top three districts
2. Virtually interview for approximately 10 minutes per teacher
3. Teachers rate Interns (1st choice, 2nd choice...)
4. Final selection determined by PDS Faculty Committee then approved by district administration prior to student notification
5. Orientation
PDS Partner Districts

EMEE PDS SPRING PARTNER SCHOOL DISTRICTS

Ephrata Area School District  https://easdpa.org/

Manheim Central School District  https://www.manheimcentral.org/

Palmyra Area School District  https://www.pasd.us/

Pequea Valley School District  https://www.pequeavalley.org/
PDS Components

- Wise mentor/intern matches (interviews + mid spring checkpoint)
- Time to build strong relationships
- Deep immersion in the classroom and building culture
- Defined classroom experiences (PDS Mentor/Intern Handbook)
- Elimination of “start-up” time for student teaching
- Supportive MU faculty presence
- Co-teaching
- Action Research
Engaging Students in Reading through Autonomy and the BHH Framework
Sarah Sambrick, Millersville University

Inquiry Question:
What effects will autonomy and the Book, Head, Heart framework have on students’ reading motivation and ability to apply test to their lives?

Inquiry Purpose:
Through the participation of task clubs and mini lessons on the Book, Head, Heart framework (Beers and Probst, 2017) students’ reading motivation and ability to make connections from the test to their real lives will increase. Readers will participate in discussions that scaffold their abilities to make connections from their past learning to the text. Additionally, teachers will stress the importance of reading by allowing students time in class to complete their weekly readings (Gallahger, 2003). They will also learn how to be more active readers as they practice annotating their text as they read using total participation annotation techniques (Himmelman and Himmelman, 2011). The students will complete several formative assessments but discussions will not be strictly graded to maintain a level of comfort and trust among group members (Osinski and Zemelman, 2013). The teacher will monitor and facilitate discussion, encouraging students to question the text and use their knowledge of the text to think beyond literal meaning to draw conclusions and make inferences (Tovani, 2004).

Review of Literature

Research, Design, Participants, and Data Collection:
- This study was conducted over the course of four weeks in two different sixth grade English Language Arts classrooms. Groups met on five separate occasions. During each meeting the teacher acted as a discussion facilitator as students answered a set of predetermined discussion questions in their book club groups.
- The context of the participants in the study were as follows: 39 sixth grade students - 16 females and 23 males; Suburban middle school. Students met over the course of four consecutive weeks for approximately 30 minutes during a 90 minute ELA block.
- Steps of data collection: 1) Anonymous surveys were administered at the end of the first week of book clubs and after the final book club meeting. 2) Observation of discussions during book club meetings. 3) Student written artifacts (Thought Logs, formative assessments).

Data Analysis:
- Analysis of Surveys: When asked to rate their motivation to complete their readings each week for book clubs on a Likert scale of 1-5, approximately 70% of students indicated either a 4 or 5.
- When asked if they would like to read multiple books by the same author at the end of the book club, approx. 72% of students answered “yes” and of that percentage, 47% listed Jordan Sonnenblick as the author they would like to read multiple books by.
- When asked if they had read a book recently that taught them a valuable life lesson, approx. 78% of students indicated that they had and of that percentage, 79% found their book club books as the book that taught them a life lesson.
- Approx. 92% of students indicated that the amount of work required of them for book clubs was right.
- Analysis of Discussion: Students frequently used academic vocabulary and knowledge of past lessons to discuss events in their books each week.
- Students shared their opinions/interests about the book while engaging in conversations centered around character development, plot, conflict, tone, and point of view.
- Students remained on task during discussion time with minimal redirection from the teacher.
- Analysis of Formative Assessment: Students answered the Big Questions for each week with responses that indicated depth of thought and connection to their lives.
- Students demonstrated metacognition while reading by recording their thoughts, questions, and connections using the TPT Talking to the Text in their weekly reflections.

Instructional Methods:
Book Choosing Day: The teacher presented several books to the students and read a short sample of each. Students ranked their book club choices from most to least desired and were placed into groups based on their preferences.

Pre-meeting: The students were given their “Thought Log” and reading calendars. They established their reading schedule over the next four weeks in their groups. Additionally, students were taught several symbols from the Talking to the Text “TPT” to use in their logs. The “Big questions” for week one were explained. What is the story about? Who is telling the story?

Meeting one: Students discussed the big questions for week one reading as well as three prevented discussion questions in their book club groups. They were given “Conversation Moved” sentence starters to guide discussion. Students individually completed a worksheet centered around character development and tone. After discussion the big question for week two was explained. What is the main conflict of your story?

Meeting two: Students discussed the big questions for week two reading as well as three prevented discussion questions in their book club groups. Students recorded their answers to the questions on a separate worksheet. After discussion the big question for week three was explained. What surprised you? What challenged, changed, or confirmed your thinking?

Meeting three: Students discussed big questions for week three reading as well as three prevented discussion questions in their book club groups. After discussion the big questions for week four were explained. What did this book teach you about other people? What did this book teach you about yourself? How will your actions or feelings change as a result of reading this book? Students were instructed to record one “Aha Moment” in their thought logs for the following week.

Meeting four: Students discussed big questions for week four reading as well as three prevented discussion questions in their book club groups. Students worked in their groups to identify the main theme of the book. The final writing project was explained and final surveys completed.

Key Findings:
Students enjoyed sharing the experience of reading with their classmates.
- Students shared that they liked having the time to “talk about their thoughts with like-minded people.”
- When asked how to improve book clubs, several students expressed that they wished they had more time in their groups to continue conversation about their books.
- Students learned valuable life lessons and identified meaningful themes from their books.
- Students wrote theme statements centered around family relationships, identity, forgiveness, love, and many other valuable topics.
- Students wished for even more autonomy.
- When asked how to improve book clubs, many students answered that a wider variety of books to choose from would have enhanced their experience.
- Several students also suggested that they would enjoy having time to talk about their reading without the guided questions.

Implications:
Creating opportunities for students to discuss common reading with their classmates in book clubs is extremely beneficial in the middle school classroom. Guided discussion about common reading helps students make deeper connections to the text and enhances their own reading experience. Students are motivated to complete readings and assignments in order to participate in book club meetings. The Book, Head, Heart framework serves as a helpful scaffold to get students to make deeper connections with the text in order to allow for application to real life. Additionally, formative assessments are beneficial to increase student accountability.

Tips for Interviewing

✗ Dress appropriately
✗ Make sure your social media is private
✗ Think about who you are as an educator - what makes you unique?
✗ Be prepared to market your strengths
✗ If they ask about your weaknesses, what will you say?
Select Your Top Three Districts

Complete Form by October 7th: https://forms.office.com/r/vNgtxypbWT

My top three districts are:

1. ______________________________
2. ______________________________
3. ______________________________

Special Considerations: ____________________

Note: Teachers know their own kids and classrooms. Teacher rankings will be used to determine placements.

You need to be signed into your MU Office 365 account to be able to complete this survey.
