

MILLERSVILLE UNIVERSITY

ACCESSIBILITY PLAN FOR BROOKS HALL

Due to its age and unique design, there are certain areas within Brooks Hall that may pose accessibility issues for certain campus community members. The University recently renovated the first floor entrance of Brooks Hall, along with the north and south corridors of the gymnasium, so that the gymnasium and the classrooms on the first floor are fully accessible to individuals with mobility impairments. In addition, the University constructed a new, accessible unisex bathroom on the first floor, which did not reduce the number of fixtures in the existing men's and women's restrooms.

Portions of the basement and second floor of Brooks Hall, however, remain inaccessible to individuals with mobility impairments. In the event an accommodation is requested the following specific student activities will be relocated as follows:

- Martial Arts Club activities scheduled for the basement of Brooks Hall will be relocated to the first floor gymnasium in Brooks Hall.
- Dance Club activities scheduled in the second floor dance studio of Brooks Hall will be relocated to an appropriately sized classroom in a fully accessible academic building on the University's campus.
- All Swim Club activities will be scheduled in the fully accessible Pucillo Gymnasium.

Individuals facing accessibility issues anywhere in Brooks Hall should immediately contact one of the following University officials so that alternate arrangements can be implemented in a reasonable timeframe. Specifically, individuals with accessibility issues who participate in the Dance Club should immediately contact one of the following University officials who will direct the individual to the accessible facility and room where the club activities are relocated.
