

Future Plans of 2012-2013 Millersville Undergraduate Graduates

The information for Millersville University's bachelor's degree recipients was collected by Planning, Assessment and Analysis, which administered an online survey to all seniors planning to graduate fall 2012 or spring 2013. Participating students, randomly-selected, were eligible to receive gift cards if they completed the survey by their respective commencements. In total, 46.7% (737) of Millersville's 2012-13 graduating class completed the survey. The survey is repeated each semester and the results are published annually in the VSA College Portrait.

Over three out of every five respondents indicated that their principal activity after graduation will be full-time paid employment.
