Davis '20

HOMETOWN:
Freeport, PA

MAJOR:
Environmental Chemistry

MINOR:
Psychology

SCHOLARSHIP AWARD:
Starbrad Excellence in Science Award 2019

POSITIVE IMPACT OF SCHOLARSHIPS:

"Without scholarship, my internship wouldn't have even been possible. Although it was a paid position it would have taken 10 of the 15 weeks to cover the cost of the credits with Millersville. The scholarship I received allowed me to fully focus on excelling at the opportunity instead of counting the hours to make sure I was on track. And I am very thankful for that because it turned out to be an invaluable experience! I now have an assortment of niche, marketable job skills that I couldn't have gotten from classwork alone."

INTERNSHIP EXPERIENCE:

"My summer internship with K&L [Plating Company] has been instrumental in helping me convert my education into hands-on career experience in the fields of analytical and environmental chemistry, as well as the niche industry of metal finishing... The company has a rich history of economic development within the community and has been repeatedly awarded for its efforts in energy efficiency, water conservation and waste reduction, making it an invaluable experience for me as an environmental concentration student. The internship has exercised my skills in data collection, time management and working independently, which will (hopefully) directly translate into success in my future career as an environmental chemist."
