Dear Campus Community,

The health and safety of our students is of utmost importance to Millersville University and we are continuing to monitor the Coronavirus (COVID-19). Based on information from the Centers for Disease Control (CDC), the World Health Organization (WHO) and local authorities, Millersville has made the difficult decision to bring home our students studying abroad in Asia and Europe.

The impacted students have been notified. They will return home by March 11 and are asked to self-isolate for 21 days at their United States home, off-campus.

For students who have yet to start their experience abroad this spring, regardless of destination, you are required to remain in the U.S. All future Millersville University study abroad programs are suspended until further notice.

Millersville University’s Incident Response Team continues to meet regularly on Coronavirus. While there have been no reports or evidence of any transmission impacting our campus community, it is critical that we remain informed.

Our first and primary concern is for the health and safety of our students, faculty and staff. Any decisions we make will be based on the latest information we have to keep our campus community safe.

We will soon be posting information to our website with the best resources for information on the Coronavirus.

Warm regards,

Dr. Vilas A. Prabhu
Provost, Vice President of Academic Affairs
