To take the placement assessment online, you will need

1. A computer with an internet connection
2. A web camera

The online placement assessment is done through ALEKS.

To take the assessment log on to ALEKS.com. When you do, you will see this on the web page that

![ALEKS](image)

Sign up as a new student. To obtain the required **Class Code**, using your **Millersville email**, contact the Department of Mathematics at mathplacement@millersville.edu

If you take the placement assessment before June 17, there will be no fee. Starting June 17, there will be a one time $5 fee. ALEKS will step through some introductory questions and have you step through "how to enter answers in ALEKS".

As you proceed you will be ask to download “LockDown browser” and there is also a link to test its sets setup. Near the bottom of the page there will be a tab to launch LockDown browser.

![Launch LockDown Browser + Webcam](image)

You will need to have closed most other programs on your computer. If any are open, you may get a message to close them. The next page to open will test your webcam and microphone and request you to record a 5 second video. When you continue you will be asked to pay $5 (starting June 17).

There are a few steps for identification after this, including asking you to have a photo of yourself. This will lead you to the beginning of the placement assessment.
Other notes:

There is a HELP tab on one of the first pages that you get to:

Clicking on the HELP tab will bring you to this page.

You have up to 3 hours to complete the questions. After completing the questions, you will get a score and also a review module. You can work the problems in the review module and retake the placement assessment. You will need to spend at least 5 hours in the review module before retaking the placement assessment and wait at least 72 hours since your previous assessment.

Let me know if you have problems with access or if you have other questions, mathplacement@millersville.edu.
