

Transfer Student vs. Visiting Student?

Transfer Students are students taking courses at another institution than the one they are currently enrolled at. A transfer credit form gives permission to transfer course credits from the visiting institution back to your home institution. In most cases the transferred grade does not count toward your GPA, but the credits will count toward graduation.

A Visiting Student is a special arrangement between PASSHE schools. If you are enrolled at a PASSHE school and register to take a course at another PASSHE school you can enroll as a Visiting Student. This form gives permission for the home institution to accept a course from another PASSHE school as though it were a course at your home institution. *In this case the course transfers completely as a course in your major AND the grade will count toward your GPA.*
