

EXISTING SIDE-BY-SIDE

ARTIST TALK: RACHEL ENG

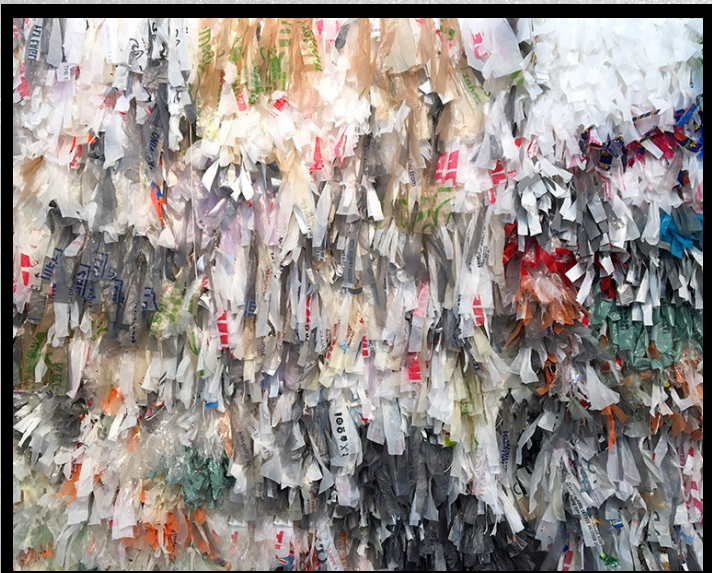

MONDAY, OCT 22ND

5PM

LOMBARDO WELCOME CENTER

Hear from artist Rachel Eng about her new [Sykes Gallery exhibit](#).

The exhibit investigates the impact that humans have on our current climate situation. There is great diversity and wonder found in our environment. Often times our landscape is romanticized, in a way that is disconnected from the many innovations we assert on our planet. Using materials commonly found in our daily lives to others from outside, the works in this show highlight and question our ability as humans to adapt, have empathy and the potential for change.

A Campus Sustainability Month event
