

Goal 3: Streamline Use of Technology to Support University Operations

- Contracted with a 24x7x365 Security Operations Center** This aligns with Integrity and Compassion. By taking action to protect the university's digital assets, Millersville is demonstrating its commitment to integrity. The partnership with Arctic Wolf Security Monitoring Platform also reflects a compassion for the university community, as it seeks to safeguard personal and institutional information.
- Continued push to move applications to the cloud** This aligns with Exploration, Professionalism, and Integrity. Moving to the cloud allows for greater exploration of innovative technologies and fosters a professional environment that stays current with industry trends. It also reflects the university's integrity by ensuring reliable and secure access to its systems.
- Comprehensive Security Plan** was established and presented to the Council of Trustees. Annual updates will be presented to the Council.
- New ARGOS software is being deployed to facilitate data distribution.

	2020-21	2021-22	2022-23
Faculty Laptops	174	195 (+12%)	244 (+25%)
